

RUNNING.COACH LAUNCHES INTERNATIONAL VERSION OF SWITZERLAND'S MOST SUCCESSFUL TRAINING SCHEDULE

A few days before Easter, running.COACH launched its international version. Runners around the world can now use the running.COACH in English and German. Other languages will follow in the months ahead.

Only four years after starting, Switzerland's three most successful long-distance runners Markus Ryffel, Viktor Röthlin, and Christian Belz present a revised version of their innovative and successful online training schedule. In addition to the multilingualism, runners of all levels (from beginners to faster runners) can benefit from professional training schedules to optimally prepare for their goals. Moreover, a new feature allows them to upload the GPX files of their trainings and analyze them on the screen. Finally, numerous requests from customers were implemented, such as performance improvements, newsfeed, new iPhone App, and a lot more.

If you are interested, take a look at running.COACH's new features and get a new training schedule:
